Pre Rinse Faucet Spring: Reduces the stress on the hose at key points.

Riser Tubes: Ideal for floor mount Faucet installation.

Spray Valve: Heavy-Duty spray valves with 1.42 GPM Designed for use in Commercial Kitchens.

Swing Nozzle: Stream Regulator Suitable for all Aluids Faucets.

Double Pantry Wall Mounted Faucet: The perfect solution when you are required with Steady water fixture in your facility.

High Performance cartridge valves that are designed for longevity.

Lever Handle with cold Index : Pressure of 20 - 126 psi at temperature of 40 F to 140 F.

Pre-rinse units are must-have equipment in all commercial kitchens. The efficient high-pressure water stream of pre-rinse units reduces turnaround time and effort in the cleaning process.

Aluids offers commercial pre-rinse units in three categories – wall mount, deck mount and Economy. Built to last long with reliable brass material and coated with food safe chrome plating. With all these qualities, pre-rinse units are a great tool to have and we have best of the lot.

SPOUT ADAPTABILITY

Swivel Gooseneck

Similar to the rigid gooseneck counterpart but with an additional feature - the neck can be rotated in any direction.

Swing Nozzle

Available in economy and heavyduty variants, swing nozzles are used in large sinks for their long and wide reach.

Double joint nozzle

The double joint nozzle allows for extralong reach in commercial kitchen sinks that are huge and designed to withstand demanding use.

Pantry faucets are ideal to use as an extra source of water inside commercial kitchens. These faucets are elegant by design and cost-effective. Our selection of pantry faucets includes a variety of options in terms of shape, number of knobs, attachment type, mount position and neck length.

These faucets are all made from brass with chrome polish. The design ensures that the faucets are drip and clog free. Wide range of Durable and Modular Solution for COMMERCIAL KITCHENS are available here.

BASE FAUCET DIFFERENTIATION

- → Having seen our range of swing nozzles, let's dive into our faucet base collection.
- Wondering why we have them separately? Well, that's because we want you to have the best of both worlds.
- ✓ It is all about giving you the product that suits your needs!

- ✓ Deck-Mount style faucet is fixed directly on the pantry sink.
- ✓ Double pantry faucet has two cartridges for both hot and cold water lines.
- All the various nozzles that we have, the Swivel Gooseneck, and Swing nozzle can be used with this faucet category.
- ✓ The double pantry faucet bases come with 4" and 8" centers and can be chosen according to the width of your sink.
- ▼ These pantry faucets are available in Platinum as well as Ecoline model.

BASE FAUCET DIFFERENTIATION

- Wall-Mount style pantry faucet, as the name suggests, is fixed on the wall itself directly above the pantry basin with only the nozzle above it.
- Any of our swing nozzles can be used with this base.
- ▼ These double pantry faucet bases come with 4" and 8" centers and can be chosen according to the width of your sink.
- These pantry faucets are available in Platinum as well as Ecoline model.

WE CARE

Whether you have a large commercial kitchen or a small tea room, it's worth conserving water. It will save you money and help save water!

Using water efficient appliances and fixtures from ALUIDS.

can make a big difference to the amount of water and money one uses in the kitchen area.

Most of our products pre-rinse units, spray valves, flexible hoses, riser tubes, swing nozzles, pantry faucets are promised to be free of lead content.

All our products represented b

are completely lead free.

What is the acceptable lead content?

The Environmental Protection Agency (EPA) of the United States federal government is the body that defines the standard – called the maximum contaminant level goals (MCLG) in accordance with the Safe Drinking Water Act. Lead in water is regulated under both Clean Water Act and Safe Drinking Water Act.

The accepted level of lead in drinking water is 0. Yes, zero tolerance. This is because lead is a toxic metal that can be harmful to human health even at low exposure levels.

Bathing and showering in water with low lead content doesn't cause harm since our skin doesn't absorb lead from the water.

How does lead get into water?

Lead can enter water when plumbing material such as pipes and fixtures containing lead are corroded, especially where the water has high acidity or low mineral content.

The solution

In order to combat this menace, there have been rapid developments to make products that come in contact with water, lead-free.

We at Aluids adhere to highest quality and safety standards and accordingly have made most of our products free of any lead exposure. Products indicated by this image are our lead-free products and components – which includes replacement parts.

OUR QUALITY CONTROL

Our world-class machinery makes accurate measurements possible & enables us to provide you durable and high-quality products.

OUR MISSION OUR PIEDGE

Quality, Trust & Service these are the long-held values that guide Aluids. We are dedicated to helping make your kitchen's a statement.

We promise to always provide safe, high-quality products made with premium materials. We pledge to remain committed to reducing our carbon footprint by applying efficient processes in the workplace to conserve energy and resources.

Over 40 Years of Experience in Manufacturing Plumbing Products
